

SHIV-NETRA 47

SHIV-NETRA47 AIR DEFENCE SYSTEM PRIVATE LIMITED

SOVEREIGN AIR DEFENCE & ADVANCED DEFENCE SYSTEMS

AIR DEFENCE SYSTEMS

UNMANNED SYSTEMS & DRONES

DEFENCE ELECTRONICS & EW

PILOT ACADEMY & DEPOT MRO

AEROSPACE DEFENCE PLATFORM

UP DEFENCE INDUSTRIAL CORRIDOR

SHIV-NETRA47 SOVEREIGN AEROSPACE SYSTEM

RESEARCH, DESIGN, ENGINEERING & DEFENCE MANUFACTURING

Dedicated to pioneering sovereign air defence systems, advanced radar and sensor networks, tactical UAV systems, and high-readiness lifecycle sustainment for India's national security forces.

100% SOVEREIGN
INDIAN CUSTODY & IP

PILLAR 01 DEFENCE SYSTEMS

Air Defence & Radar

Researching, designing, and manufacturing advanced air defence architectures, early warning radar, sensor-based surveillance, and electronic countermeasure systems.

PILLAR 02 AEROSPACE

UAVs & Drone Systems

End-to-end engineering, precision assembly, payload integration, and deployment of tactical unmanned aerial systems and multi-theatre drone architectures.

PILLAR 03 AI & EW

C2, Comms & Cyber

Command and control (C2) systems, encrypted communications, electronic warfare (EW), machine learning autonomy, and cyber-hardened defence software.

PILLAR 04 SUSTAINMENT

Pilot Academy & MRO

Comprehensive drone pilot simulation, technical skill development, alongside depot-level repair, calibration, modification, and total lifecycle support.

OFFICIAL CORPORATE CHARTER • STATUTORY OBJECT CLAUSE

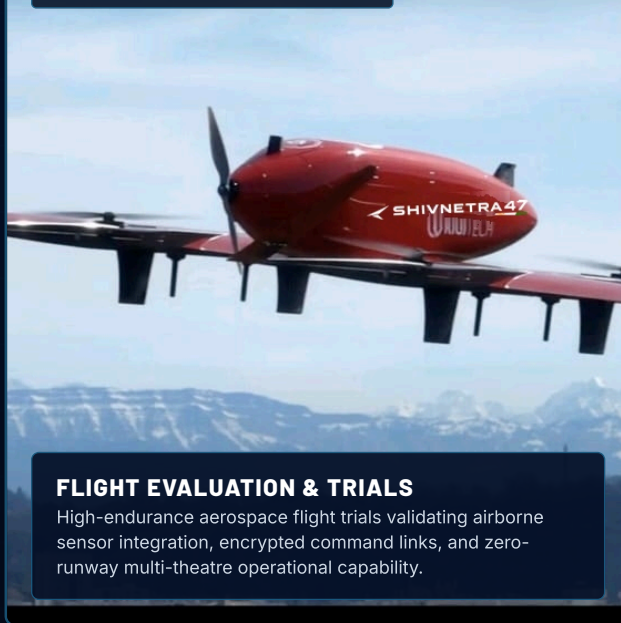

MAIN OBJECT OF THE PROPOSED COMPANY • SHIV-NETRA47

Registered corporate objects established under the Companies Act, 2013 and aligned with the Ministry of Defence (MoD) Make in India framework.

Incorporated to carry on the business of **researching, designing, developing, engineering, manufacturing, assembling, integrating, testing, commissioning, supplying, installing, operating, maintaining, repairing, upgrading, and servicing** sovereign defence platforms:

- Air Defence & Radar Systems:** Advanced air defence architectures, defence electronics, early warning radar, surveillance, detection, and tracking systems.
- Unmanned Aerial Vehicles (UAVs) & Drones:** Complete manufacture, assembly, and integration of drones, flight control systems, and mission payloads.
- C2, Comms & Electronic Warfare:** Command and control (C2) systems, jam-resistant communication links, and electronic countermeasure (ECM) suites.
- Defence R&D, AI & Cybersecurity:** Applied artificial intelligence, machine learning autonomy, autonomous systems, and sovereign cyber-resilience.
- Pilot Academy & Depot MRO:** Professional drone pilot training, simulation programs, depot-level repair, calibration, modification, and total lifecycle support.

SOVEREIGN AEROSPACE PLATFORM

FLIGHT EVALUATION & TRIALS

High-endurance aerospace flight trials validating airborne sensor integration, encrypted command links, and zero-runway multi-theatre operational capability.

COMPREHENSIVE DEFENCE ENGINEERING LIFECYCLE SPECTRUM

FULL LIFECYCLE SUSTAINMENT

STAGE 01

R&D

Research & Design

Aerodynamic simulation, radar cross-section optimization, sensor architectures, and autonomous AI engineering.

STAGE 02

MANUFACTURING

Precision Assembly

Airframe composite fabrication, defence electronics assembly, payload modular integration, and military avionics.

STAGE 03

TESTING

Testing & Trials

Environmental qualification, electronic warfare countermeasure verification, and range trial validation.

STAGE 04

DEPLOYMENT

Operational Supply

Delivering mission-ready defence platforms, ground tactical systems, and armed forces operational handover.

STAGE 05

MRO

Depot MRO

Depot-level servicing, continuous calibration, structural modification, and technological enhancement.

DOMAIN 01

Air Defence & Radar

Next-generation radar systems, multi-spectral sensor fusion, early warning detection, and active countermeasure suites.

DOMAIN 02

Tactical UAV Platforms

Indigenous manufacturing of unmanned aerial systems, precision flight controllers, mission payloads, and allied defence systems.

DOMAIN 03

Pilot Training Academy

Directorate-aligned drone pilot certification, tactical mission simulation programs, technical crew training, and skill academies.

DOMAIN 04

Alliances & Licensing

Bilateral joint ventures, European testing corridors, technology transfer, and international export compliance.

ENTERPRISE CAPABILITY DOMAINS • STATUTORY OPERATIONS

CORE BUSINESS VERTICALS & DEFENCE SYSTEMS SPECTRUM

Specialized engineering divisions dedicated to researching, manufacturing, and deploying sovereign air defence systems, aerospace platforms, and tactical electronics.

AEROSPACE ENGINEERING

SOVEREIGN AEROSPACE & UAV INTEGRATION

High-altitude, zero-runway autonomous platforms manufactured and configured for multi-theatre defence operations, surveillance, and tactical logistics.

DEFENCE ELECTRONICS

COMMAND, CONTROL & SENSOR TELEMETRY

Ruggedized military electronics, encrypted telecommand hardware, edge computing nodes, and real-time situational awareness platforms.

VERTICAL 01

AIR DEFENCE & RADAR

Air Defence & Radar Systems

Researching, designing, developing, and manufacturing **air defence systems, advanced defence systems, radar and sensor-based systems**, alongside surveillance, detection, and autonomous tracking systems engineered for sovereign national airspace security.

3D Search Radar Optronic Tracking Multi-Sensor Fusion
Air Defence Batteries

VERTICAL 02

UNMANNED SYSTEMS

UAVs & Drone Technologies

End-to-end **manufacture, assembly, development, and integration of drones, unmanned aerial vehicles (UAVs), payloads, control systems, and allied technologies** capable of operating across rugged, GPS-contested border theatres.

Tactical VTOL UAVs Precision Payloads Avionics Integration
Composite Airframes

VERTICAL 03

C2 & COUNTERMEASURES

C2, Communications & EW

Engineering secure **command and control (C2) systems, military communication systems, electronic warfare (EW), and countermeasure systems** delivering jam-resistant data links, spectrum dominance, and distributed coordination.

Encrypted Datalinks Tactical C4ISR
Electronic Countermeasures RF Mesh Radios

VERTICAL 04

AI & CYBER RESILIENCE

Defence Electronics, AI & Cyber

Pioneering **research and development, artificial intelligence, machine learning, autonomous systems, and cybersecurity** tailored for advanced aerospace and defence applications, guaranteeing sovereign telemetry and data integrity.

Edge AI Analytics Neural Target Tracking
Cybersecurity Hardening Autonomous Guidance

UP DEFENCE INDUSTRIAL CORRIDOR • PRECISION MANUFACTURING HUB

All systems are engineered, assembled, and validated under rigorous Indian Defence standards (MoD / DGQA guidelines), ensuring complete indigenous control, export compliance, and strategic national autonomy.

INDIGENOUS IP & DESIGN

DAP 2020 COMPLIANT

MIL-STD QUALITY ASSURANCE

EXPANDED CAPABILITY ECOSYSTEM • INSTITUTIONAL FRAMEWORK

GLOBAL ALLIANCES, PILOT ACADEMY & DEPOT MRO

Statutory programs delivering certified pilot training, simulation facilities, depot-level lifecycle sustainment, and international technology transfer.

AEROSPACE TESTING CORRIDOR

IN-HOUSE FLIGHT TEST FACILITY (SPAIN)

INTERNATIONAL FLIGHT CORRIDOR & ACADEMY VALIDATION

Conducting rigorous flight testing, sensor calibration, pilot operational conversion, and European airspace safety validation supported by our in-house flight test division.

GLOBAL REACH
TECH COLLABORATION

PILLAR 01

ACADEMY

Drone Training & Pilot Simulation

Chartered to provide drone training, pilot training, technical training, simulation and skill development programmes for defence, aerospace, and specialized industrial personnel.

- Advanced Mission Flight Simulation
- Pilot Type Ratings & Certification
- Sensor & Payload Operator Training
- Tactical Mission Commander Courses

PILLAR 02

DEPOT MRO

Depot MRO & Lifecycle Support

Mandated to undertake repair, maintenance, servicing, calibration, modification and upgradation of drones, UAVs and other advanced defence and aerospace systems over their complete operational life.

- Depot-Level Maintenance & Overhaul
- Avionics Recalibration & Upgrades
- Composite Airframe Structural Repair
- 24/7 Defence Field Support Units

PILLAR 03

TRADE & LICENSING

Alliances & Technology Transfer

Authorized to execute procurement, import, export, distribution, technology licensing, collaboration, joint ventures and technology transfer subject to Government of India approvals.

- Bilateral Technology Transfer (ToT)
- In-House European Flight Test Facility
- Sovereign Indian Telecommand & IP
- Compliant Defence Export Pathways

DEFENCE PRODUCTION ASSURANCE • SOVEREIGN QUALITY GOVERNANCE

Structured to support India's Armed Forces, paramilitary organizations, and allied defence sectors with AS9100D quality precision, sovereign IP custody, and dedicated lifecycle sustainment.

AS9100D COMPLIANT

MIL-STD QUALIFIED

MoD D6QA ALIGNED

DEFENDING THE FRONTIERS OF BHARAT WITH SOVEREIGN AIR DEFENCE & AEROSPACE POWER

CORPORATE SCOPE & STATUTORY BUSINESS MANDATE

FULL DEFENCE & AEROSPACE SPECTRUM

01 // AIR DEFENCE

Air Defence & Radar Systems

Researching, developing, engineering, manufacturing, integrating and commissioning radar and sensor-based surveillance, detection, tracking, C2, and countermeasure systems.

02 // UAS & DRONES

UAVs, Drones & Swarm Systems

End-to-end design, manufacture, assembly, and integration of tactical UAVs, autonomous aerospace architectures, mission payloads, and flight control avionics.

03 // TRAINING ACADEMY

Drone Pilot & Technical Academy

Comprehensive pilot training, simulation programs, operational conversion, technical training, and skill development curriculums for defence and aerospace personnel.

04 // ADVANCED R&D

Defence R&D & Autonomous AI

Prototyping advanced artificial intelligence, machine learning, autonomous guidance, cyber-secure communication links, and sovereign defence electronics.

05 // DEPOT SUSTAINMENT

Depot MRO, Calibration & Upgrades

Full-lifecycle support: repair, maintenance, servicing, sensor calibration, modification, and continuous upgradation of drones, UAVs, and military aerospace assets.

06 // GLOBAL ALLIANCES

Technology Transfer & Licensing

Procurement, distribution, technology transfer, and joint ventures in permitted aerospace products with international aerospace partners, adhering to GoI export regulations.
