

ENTERPRISE CAPABILITY DOMAINS • STATUTORY OPERATIONS

CORE BUSINESS VERTICALS & DEFENCE SYSTEMS SPECTRUM

Specialized engineering divisions dedicated to researching, manufacturing, and deploying sovereign air defence systems, aerospace platforms, and tactical electronics.

AEROSPACE ENGINEERING

SOVEREIGN AEROSPACE & UAV INTEGRATION

High-altitude, zero-runway autonomous platforms manufactured and configured for multi-theatre defence operations, surveillance, and tactical logistics.

DEFENCE ELECTRONICS

COMMAND, CONTROL & SENSOR TELEMETRY

Ruggedized military electronics, encrypted telecommand hardware, edge computing nodes, and real-time situational awareness platforms.

VERTICAL 01

AIR DEFENCE & RADAR

Air Defence & Radar Systems

Researching, designing, developing, and manufacturing **air defence systems, advanced defence systems, radar and sensor-based systems**, alongside surveillance, detection, and autonomous tracking systems engineered for sovereign national airspace security.

3D Search Radar Optronic Tracking Multi-Sensor Fusion
Air Defence Batteries

VERTICAL 02

UNMANNED SYSTEMS

UAVs & Drone Technologies

End-to-end **manufacture, assembly, development, and integration of drones, unmanned aerial vehicles (UAVs), payloads, control systems, and allied technologies** capable of operating across rugged, GPS-contested border theatres.

Tactical VTOL UAVs Precision Payloads Avionics Integration
Composite Airframes

VERTICAL 03

C2 & COUNTERMEASURES

C2, Communications & EW

Engineering secure **command and control (C2) systems, military communication systems, electronic warfare (EW), and countermeasure systems** delivering jam-resistant data links, spectrum dominance, and distributed coordination.

Encrypted Datalinks Tactical C4ISR
Electronic Countermeasures RF Mesh Radios

VERTICAL 04

AI & CYBER RESILIENCE

Defence Electronics, AI & Cyber

Pioneering **research and development, artificial intelligence, machine learning, autonomous systems, and cybersecurity** tailored for advanced aerospace and defence applications, guaranteeing sovereign telemetry and data integrity.

Edge AI Analytics Neural Target Tracking
Cybersecurity Hardening Autonomous Guidance

UP DEFENCE INDUSTRIAL CORRIDOR • PRECISION MANUFACTURING HUB

All systems are engineered, assembled, and validated under rigorous Indian Defence standards (MoD / DGQA guidelines), ensuring complete indigenous control, export compliance, and strategic national autonomy.

INDIGENOUS IP & DESIGN

DAP 2020 COMPLIANT

MIL-STD QUALITY ASSURANCE
