

OFFICIAL CORPORATE CHARTER • STATUTORY OBJECT CLAUSE • DEFENCE SPECTRUM

STATUTORY MANDATE & CORE BUSINESS VERTICALS

Registered corporate objects established under the Companies Act, 2013 and aligned with the Ministry of Defence (MoD) Make in India framework.

Incorporated to carry on the business of **researching, designing, developing, engineering, manufacturing, assembling, integrating, testing, commissioning, supplying, installing, operating, maintaining, repairing, upgrading, and servicing** sovereign defence platforms:

- Air Defence & Radar Systems:** Advanced air defence architectures, defence electronics, early warning radar, surveillance, detection, and tracking systems.
- Unmanned Aerial Vehicles (UAVs) & Drones:** Complete manufacture, assembly, and integration of drones, flight control systems, and mission payloads.
- C2, Comms & Electronic Warfare:** Command and control (C2) systems, jam-resistant communication links, and electronic countermeasure (ECM) suites.
- Defence R&D, AI & Cybersecurity:** Applied artificial intelligence, machine learning autonomy, autonomous systems, and sovereign cyber-resilience.
- Pilot Academy & Depot MRO:** Professional drone pilot training, simulation programs, depot-level repair, calibration, modification, and total lifecycle support.

SOVEREIGN AEROSPACE PLATFORM

FLIGHT EVALUATION & TRIALS

High-endurance aerospace flight trials validating airborne sensor integration, encrypted command links, and zero-runway multi-theatre operational capability.

COMPREHENSIVE DEFENCE ENGINEERING LIFECYCLE SPECTRUM

END-TO-END SUSTAINMENT

STAGE 01

R&D

Research & Design

Aerodynamic simulation, RCS optimization, sensor architectures, and AI autonomy.

STAGE 02

MANUFACTURING

Precision Assembly

Airframe composites, defence electronics assembly, and military avionics.

STAGE 03

TESTING

Testing & Trials

Environmental qualification, electronic warfare countermeasures, and range trials.

STAGE 04

DEPLOYMENT

Operational Supply

Delivering mission-ready defence platforms and armed forces operational handover.

STAGE 05

MRO

Depot MRO

Depot-level servicing, continuous calibration, and structural upgrades.

CORE BUSINESS VERTICALS & DEFENCE SYSTEMS SPECTRUM

STATUTORY OPERATIONS

VERTICAL 01

AIR DEFENCE & RADAR

Air Defence & Radar Systems

Researching, designing, developing, and manufacturing **air defence systems, advanced defence systems, radar and sensor-based systems**, alongside surveillance, detection, and autonomous tracking systems engineered for sovereign national airspace security.

3D Search Radar

Optronic Tracking

Multi-Sensor Fusion

Air Defence Batteries

VERTICAL 02

UNMANNED SYSTEMS

UAVs & Drone Technologies

End-to-end **manufacture, assembly, development, and integration of drones, unmanned aerial vehicles (UAVs), payloads, control systems, and allied technologies** capable of operating across rugged, GPS-contested border theatres.

Tactical VTOL UAVs

Precision Payloads

Avionics Integration

Composite Airframes

VERTICAL 03

C2 & COUNTERMEASURES

C2, Communications & EW

Engineering secure **command and control (C2) systems, military communication systems, electronic warfare (EW), and countermeasure systems** delivering jam-resistant data links, spectrum dominance, and distributed coordination.

Encrypted Datalinks

Tactical C4ISR

Electronic Countermeasures

RF Mesh Radios

VERTICAL 04

AI & CYBER RESILIENCE

Defence Electronics, AI & Cyber

Pioneering **research and development, artificial intelligence, machine learning, autonomous systems, and cybersecurity** tailored for advanced aerospace and defence applications, guaranteeing sovereign telemetry and data integrity.

Edge AI Analytics

Neural Target Tracking

Cybersecurity Hardening

Autonomous Guidance
