

CORPORATE CHARTER • STATUTORY OBJECT CLAUSE

STATUTORY CHARTER & CORE DEFENCE VERTICALS

Corporate objects established under the Companies Act, 2013 and aligned with the Ministry of Defence (MoD) Make in India framework to research, engineer, manufacture, and sustain sovereign defence

ded to carry on the business of **researching, designing, developing, engineering, manufacturing, assembling, g, testing, commissioning, supplying, installing, operating, maintaining, repairing, upgrading, and** sovereign defence platforms:

ence & Radar Systems: Advanced air defence architectures, early warning radar, surveillance, detection, and tracking systems.

ed Aerial Vehicles (UAVs) & Drones: Complete manufacture, assembly, and integration of drones, flight control systems, and payloads.

ms & Electronic Warfare: Command and control (C2) systems, jam-resistant communication links, and electronic countermeasure tes.

R&D, AI & Cybersecurity: Applied artificial intelligence, machine learning autonomy, autonomous systems, and sovereign cyber-

demey & Depot MRO: Professional drone pilot training, simulation programs, depot-level repair, calibration, modification, and cycle support.

SOVEREIGN AEROSPACE PLATFORM

FLIGHT EVALUATION & TRIALS

High-endurance aerospace flight trials validating airborne sensor integration, encry command links, and zero-runway multi-theatre operational capability.

ENSIVE DEFENCE ENGINEERING LIFECYCLE SPECTRUM

FULL LIFECYCLE S

	R&D	MANUFACTURING	TESTING	DEPLOYMENT	
Design	STAGE 02 Precision Assembly Airframe composite fabrication, defence electronics assembly, payload modular integration, and military avionics.	STAGE 03 Testing & Trials Environmental qualification, electronic warfare countermeasure verification, and range trial validation.	STAGE 04 Operational Supply Delivering mission-ready defence platforms, ground tactical systems, and armed forces operational handover.	STAGE 05 Depot MRO Depot-level servicing, continuous co structural modification, and techno enhancement.	
simulation, radar cross-section sensor architectures, and D tracking, and sovereign airspace surveillance.					

01

AIR DEFENCE & RADAR

ence & Radar Systems

designing, and manufacturing **air defence systems, advanced radar, and sensor networks** alongside optronic

sh Radar

Optronic Tracking

Multi-Sensor Fusion

Air Defence Batteries

03

C2 & COUNTERMEASURES

munications & EW

VERTICAL 02

UNMANNED

UAVs & Drone Technologies

End-to-end **manufacture, assembly, and deployment of fixed-wing VTOL UAVs, tactical swarms, and precision p**

engineered for GPS-contested border theatres.

Tactical VTOL UAVs

Precision Payloads

Avionics Integration

Composite Airfr

VERTICAL 04

AI & CYBER RE

Defence Electronics, AI & Cyber

Secure **command and control (C2)** architectures, military communication systems, and **electronic warfare (EW)**
jam-resistant data links and spectrum dominance.

[Secure Datalinks](#) [Tactical C4ISR](#) [Electronic Countermeasures](#) [RF Mesh Radios](#)

Pioneering **applied AI**, **machine learning autonomy**, **autonomous systems**, and **cybersecurity** tailored for advanced
applications, guaranteeing sovereign data integrity.

[Edge AI Analytics](#) [Neural Target Tracking](#) [Cyber Hardening](#) [Autonomous Guidance](#)
